

NRG Report for 11th May 2026

- 1) Verge - Looking good- we are monitoring it and will continue to work it. Wildflower sign and labels. Plants paid for by the Community Trust and donated.
- 2) Church Yard - we are leaving small areas to see what species grow.
 - semi circle of small native trees planted for seating area with ongoing care and planting.
 - Lichen identification meeting with outside experts
- 3) Tump/Mound - planted with small native trees to enhance it as a play area. Planting undertaken with the Llanfair Tots group- much enjoyed by them.
- 4) New Members - Graham Beadle and Ben Eastop
- 5) Triangle - Met at the Triangle to chat about ideas - possible future project once the Projects we have started are established.
- 6) The Green - We would like to undertake the management of the Green - to allow wild flowers to grow without being cut too early. Requires coordination with the church yard cutting.
- 7) Shropshire Hills - Jane Thomas attended the conference in Clun and made some contacts. There is funding we could apply for once we identify a suitable project eg No Mow May - the Plantlife Verges project.

We are a happy group- enjoying each other's company and the projects we are doing. We are mindful not to take on too much but to continue with what we can achieve - it feels quite good for the first year.
